

On a small island in the Nile River south of Aswan, the ancient Egyptians constructed one of their most revered and visually stunning religious sites. The Temple of Philae, dedicated primarily to the goddess Isis, was built across a span of several centuries, with the most substantial construction occurring during the Ptolemaic period between roughly 300 and 30 BCE. Later additions were made under Roman rule, making it a rare architectural testament to the blending of Egyptian, Greek, and Roman influences.

The monument served as a major center of Isis worship, whose influence extended well beyond Egypt into the rest of the Mediterranean. Ancient pilgrims traveled considerable distances to participate in rituals and festivals held on the island. The structures remaining today include the magnificent Temple of Isis, the elegant Kiosk of Trajan, and a series of colonnaded courtyards decorated with intricate relief carvings depicting mythological scenes and royal offerings to the gods.

In the 20th century, the ancient structure faced a crisis that threatened its very existence. The construction of the Aswan Low Dam in 1902 caused the Nile to flood Philae Island for much of each year, submerging the lower portions of the sacred edifice for extended periods. By the time the Aswan High Dam was completed in 1970, the island was at risk of permanent inundation. In response, UNESCO coordinated an international rescue effort that would prove to be **an extraordinary feat of preservation engineering**.

Between 1972 and 1980, the entire complex was taken apart piece by piece and rebuilt on nearby Agilkia Island, which was reshaped to resemble the landscape of the original site. The operation involved cataloguing and relocating more than 40,000 individual stones, each one placed back in its precise original position. The undertaking required years of planning, multinational cooperation, and considerable financial investment from governments around the world.

Today, the Temple of Philae stands much as it originally did, as a compelling symbol of humanity's commitment to conserving its cultural heritage. Visitors who arrive by boat to view its elegant pylons and carved reliefs encounter an architectural wonder that has, in a very real sense, survived against all odds.

43. Which set of words is used in the passage to refer to the Temple of Philae?

- (A) complex, construction, heritage, landscape
- (B) complex, testament, structures, natural site
- (C) monument, structure, complex, sacred edifice
- (D) monument, complex, undertaking, testament

44. According to the passage, which of the following is **NOT** true about the Temple of Philae?

- (A) It was a place where people mainly worshipped Isis.
- (B) It underwent further construction during Roman times.
- (C) It disappeared permanently after the completion of the dams.
- (D) It contains carved reliefs depicting myths and royal tributes to the gods.

45. What does "**an extraordinary feat of preservation engineering**" refer to in the third paragraph?

- (A) The expansion of the Temple of Philae during Roman times.
- (B) The relocation and reconstruction of the temple on a nearby island.
- (C) The building of both the Aswan Low Dam and the Aswan High Dam.
- (D) The efforts made to stop annual flooding caused by the Aswan Low Dam.

46. How does the author conclude the passage?

- (A) By portraying the temple as evidence of people's dedication to preserving the past.
- (B) By urging governments to allocate more funding for archaeological preservation.
- (C) By demonstrating the engineering challenges involved in repairing the temple.
- (D) By outlining future environmental threats that historical sites may face.

108 課綱學科能力測驗英文考科模擬試題 教二

教科書版本：三民、龍騰、翰林（範圍：第四冊全）

第壹部分、選擇題（占 62 分）

一、詞彙題（占 10 分）

說明：第 1 題至第 10 題為單選題，每題 1 分。

1. As new evidence continues to emerge, this case remains _____ and is subject to further investigation.

- (A) automatic (B) ongoing (C) previous (D) constant

2. The group project revealed a noticeable _____ in participation, with some members taking more responsibility while others contributed less.

- (A) label (B) hint (C) mess (D) gap

3. The _____ painting looks so real in every detail that even experts find it hard to tell at first glance.

- (A) wicked (B) native (C) fake (D) solid

4. Lily and Penny's friendship changed _____ after a serious misunderstanding occurred during their trip to Japan.

- (A) dramatically (B) technically (C) vividly (D) barely

5. Attractive marketing campaigns can _____ consumers into buying products they didn't originally intend to purchase.

- (A) forbid (B) reward (C) halt (D) sway

6. As the old man's only _____, the dog became a source of comfort and happiness in his later years.

- (A) lifeguard (B) companion (C) detective (D) pioneer

7. The _____ amount of waste produced each year requires immediate attention from both individuals and businesses if we want to enjoy a cleaner planet.

- (A) tremendous (B) miserable (C) reluctant (D) fatal

8. Loud noise from the nightclub can seriously _____ nearby residents and make it difficult for them to sleep peacefully.

- (A) horrify (B) neglect (C) disturb (D) motivate

9. In digital communication, a lack of facial expressions can create a _____ that often leads to confusion or misinterpretation.

- (A) defense (B) barrier (C) vacancy (D) contrast

10. Scott didn't want to _____ in the argument between his two colleagues, so he quietly walked away.

- (A) flee (B) expand (C) withdraw (D) interfere

二、綜合測驗（占 10 分）

說明：第 11 題至第 20 題為單選題，每題 1 分。

第 11 至 15 題為題組

Life is full of decisions, both big and small. Making certain choices can be difficult, especially when important matters are involved. One reason is opportunity cost, a concept that refers to the benefits a person forgoes when choosing one option over another.

Even with minor decisions, opportunity cost can still be observed. 11 a person has the choice of buying a nice outfit for NT\$2,500 or spending that money on a night out with friends at a fancy restaurant. If the person chooses the outfit, they enjoy the 12 of owning and wearing it, but the opportunity cost is the enjoyable meal and time spent with friends. Conversely, if the money is spent on dinner, the person misses out on having a stylish new outfit.

When more significant decisions such as those involving larger financial matters are involved, opportunity cost becomes even more important. Suppose someone 13 to spend NT\$1.5 million on a new vehicle. They could use the entire amount to purchase a luxury vehicle, or they could opt for a more 14 and invest the remaining amount. By choosing the less expensive option, they gain the opportunity to earn investment income. However, they 15 the pleasure of driving a luxury car. The next time you're faced with a decision, consider the opportunity cost before making your choice.

11. (A) Given that (B) Keep in mind (C) Let's say (D) It turns out
12. (A) illustration (B) satisfaction (C) admiration (D) distribution
13. (A) had afforded (B) were affording (C) will afford (D) can afford
14. (A) economical model (B) powerful machine (C) advanced tablet (D) sophisticated device
15. (A) drop by (B) give up (C) let down (D) take off

第 16 至 20 題為題組

(分 10 占) 題數 意文 · 三

Picture a forest with large trees reaching into the sky but where there is almost no sound from animals. The forest may appear healthy, but the lack of wildlife signals that the area is __16__ empty forest syndrome. Also known as silent forest syndrome, this condition threatens the long-term survival of forest ecosystems.

To understand why empty forest syndrome is so dangerous, people need to realize that animals are key to spreading seeds. Many animals consume fruits, and after the seeds pass through their digestive systems, they are __17__ on the forest floor. This process helps maintain plant diversity in the forest, which is crucial to its survival.

There are several potential solutions to empty forest syndrome, all of which are __18__ its underlying causes. Since overhunting is one of the main reasons for the loss of wildlife, greater __19__ against illegal hunting is required, along with stricter penalties for those who violate them. Meanwhile, habitat destruction caused by clearing forested areas for growing crops or building roads __20__ another factor that contributes to wildlife decline. Therefore, policies that promote forest conservation rather than further development should be adopted. Hopefully, the world's forests will continue to echo with the sounds of wildlife for generations to come.

16. (A) suffering from (B) transferring to (C) boasting about (D) getting over

17. (A) disclosed (B) defeated (C) deposited (D) downloaded

18. (A) related to (B) nothing but (C) calling for (D) far from

19. (A) protection of habitats (B) enforcement of laws
(C) observation of nature (D) development of tourism

20. (A) have been (B) will be (C) are (D) is

(E) incorrect

(D) fixed

(C) angle

(B) contact

(A) inspired

(L) judgments

(F) scientific

(H) stars

(C) interpreters

(B) sensation

20. (A) 20. (B) 21. (C) 22. (D) 23. (E) 24. (F) 25. (G) 26. (H) 27. (I) 28. (J) 29. (K) 30. (L)

三、文意選填（占 10 分）

說明：第 21 題至第 30 題為單選題，每題 1 分。

第 21 至 30 題為題組

Have you ever stood in front of a portrait and felt as if the person in the painting were watching you? Many people experience this strange ___21___ when they look at certain pictures. Even after moving across the room, they still feel that the eyes in the image remain ___22___ on them. Although this experience may seem mysterious, scientists have shown that it is actually a visual illusion. This phenomenon is widely known as the “Mona Lisa effect,” a term ___23___ by *Mona Lisa*, the famous painting created by Leonardo da Vinci.

The illusion occurs when the person in a picture appears to be looking almost directly forward. In photographs, this effect often arises when someone ___24___ straight into a camera lens. Researchers have found that the illusion can still work even when the eyes are turned slightly to one side. As long as the gaze remains within about five degrees of the center, viewers usually believe that the person in the picture is making eye ___25___ with them. As a result, the brain ___26___ the eyes as following the observer wherever they stand.

Since the illusion bears the name *Mona Lisa*, many people assume that the painting itself demonstrates the effect. Surprisingly, this idea is ___27___. In 2019, German researchers conducted a study on the issue. During the experiment, 24 participants viewed digital images of the painting from different positions and distances. They made more than 2,000 ___28___ about the direction of the woman’s gaze. Most reported that she did not appear to be looking directly at them but slightly toward the viewer’s right side.

This result supports the ___29___ explanation behind the illusion. Experts estimate that the gaze of the woman in the painting is more than 15 degrees away from the center. Because this ___30___ is much larger than the narrow range required for the effect, the illusion does not occur in the painting. Ironically, the artwork most closely connected to the phenomenon fails to display it.

|---------------|----------------|------------|----------------|---------------|
| (A) inspired | (B) contact | (C) angle | (D) fixed | (E) incorrect |
| (F) sensation | (G) interprets | (H) stares | (I) scientific | (J) judgments |

答案：21. (F) 22. (I) 23. (A) 24. (H) 25. (B)
26. (G) 27. (E) 28. (J) 29. (I) 30. (C)

第 31 至 34 題為題組

Any seasoned runner knows that one of the most dreaded moments in a marathon is “hitting the wall.” This sudden and overwhelming sense of exhaustion typically strikes somewhere between 30 and 35 kilometers into a race. The resulting fatigue can reduce even well-trained runners to a slow shuffle or force them to stop altogether.

The explanation lies in how the body produces and uses energy. During prolonged exercise, the body relies primarily on glycogen, a form of glucose stored in the muscles and liver. 31 As glycogen stores become depleted without adequate replenishment, the body is forced to depend more heavily on fat for fuel. Because fat is converted into usable energy more slowly than glycogen, runners often experience a sharp decline in performance. Muscles cease to respond with their usual precision, fatigue builds rapidly, and some runners may also experience mental fog.

32 A sound nutrition strategy is paramount. Consuming carbohydrates in the days leading up to a race, a practice known as carbohydrate loading, maximizes glycogen storage before the starting gun fires. During the race itself, having energy gels or sports drinks at regular intervals can help maintain blood glucose levels and delay the onset of exhaustion. 33 Runners who set out too aggressively often use up their energy reserves at an unsustainable rate. This greatly increases the likelihood of a collapse later. Experienced athletes adopt a disciplined, even pace from the start, conserving enough energy to sustain performance through the final kilometers.

34 Visualization techniques and psychological conditioning can help runners push through discomfort when their bodies begin to protest. Ultimately, conquering the wall requires both physical preparation and the determination to keep moving forward when the challenge is at its greatest.

- (A) Equally important is pacing.
- (B) Mental toughness also plays a significant role.
- (C) Fortunately, runners can take deliberate steps to minimize this risk.
- (D) Some runners mistakenly believe that mental strength alone can overcome poor physical preparation.
- (E) Under normal circumstances, these reserves provide sufficient fuel for about 90 to 120 minutes of intense effort.

答案：31. (E) 32. (C) 33. (A) 34. (B)

五、閱讀測驗（占 24 分）

說明：第 35 題至第 46 題為單選題，每題 2 分。

第 35 至 38 題為題組

Few dishes in British cuisine provoke as much curiosity as stargazy pie. Its unusual appearance is certainly part of the reason. With the heads of whole fish poking through the golden-brown pastry crust and their eyes pointing toward the sky, the dish appears almost theatrical. To those unfamiliar with the

pie, the presentation can seem deliberately eccentric. Yet this distinctive Cornish dish carries centuries of history and cultural significance behind its peculiar appearance.

Stargazy pie originates from the small fishing village of Mousehole in Cornwall, England. According to local legend, the pie was created to commemorate a fisherman named Tom Bawcock. In the mid-16th century, a severe winter storm prevented fishing boats from leaving the harbor for weeks, leaving the entire village on the verge of starvation. Undeterred by the violent seas, Bawcock ventured out alone and returned with a remarkable catch that was sufficient to feed everyone. The villagers celebrated his bravery by baking a large pie using the fish he had brought back. They left the fish heads rising above the crust as a sign that the catch had been plentiful and that the community had survived.

The tradition has endured to this day. Every year on December 23, the residents of Mousehole observe Tom Bawcock's Eve with a ceremonial stargazy pie. It is paraded through the village streets before being shared among community members. Pilchards are the fish most commonly used, although sardines and herrings are also traditional ingredients. A practical reason for leaving the heads intact and facing upward is that the oils and juices from the fish flow back into the filling during baking. This enhances the pie's richness rather than being lost.

Stargazy pie is rarely found outside Cornwall. Even within Britain, many people know the dish only from photographs and have never tasted it themselves. Yet every December, the curious sight of fish heads protruding skyward attracts visitors to Mousehole and helps keep the centuries-old tradition alive.

35. Which of the following pictures best shows stargazy pie?

(A)

(B)

(C)

(D)

36. What is the purpose of having fish heads visible above the crust in stargazy pie?

(A) It makes the pie eye-catching and easier to carry during village celebrations.

(B) It symbolizes an abundant catch while serving a practical culinary function.

(C) It reflects a decorative baking tradition developed by Cornish fishermen.

(D) It commemorates the villagers' perseverance through difficult times.

37. Which of the following statements is true according to the passage?

(A) Tom Bawcock braved a storm to catch fish.

(B) Visitors are drawn to Mousehole to taste the pie.

(C) Only pilchards are traditionally used in stargazy pie.

(D) Stargazy pie is usually made with sardines and herrings.

38. What can be inferred from the passage?

(A) Tom Bawcock's story is widely accepted as a historical fact.

(B) Stargazy pie has become a common dish across Britain.

(C) Cornwall used to face food shortages during winters.

(D) Stargazy pie is better known than it is widely eaten.

In the months preceding the outbreak of World War II, a young British stockbroker named Nicholas Winton organized one of the most remarkable rescue operations in modern history. Born in London in 1909 to German-Jewish parents who had converted to Christianity, Winton grew up with little connection to his heritage. It was not until December 1938, when he abandoned a planned skiing holiday and traveled to Prague, Czechoslovakia, that his life took an entirely unexpected trajectory.

Upon arriving in Prague, Winton encountered a humanitarian crisis that would change the course of his life. As Nazi influence expanded across Czechoslovakia, thousands of Jewish families were desperate to send their children to safety. Existing relief organizations were overwhelmed and unable to cope with the scale of the crisis. Winton, then only 29 years old and working without any official authorization, established a makeshift office in his hotel room and began to coordinate an ambitious evacuation program. He persuaded British families to serve as foster parents, navigated complicated bureaucratic procedures to secure the necessary travel documents, and personally raised funds to cover the transportation costs.

Between March and August 1939, Winton arranged for eight trains to carry a total of 669 Jewish children from Prague to London. A ninth train, scheduled to depart on September 1st, was cancelled when Germany invaded Poland and World War II officially began. The children who missed that final departure were almost certainly killed in the Holocaust.

Despite the magnitude of what he had accomplished, Winton never spoke publicly about his wartime efforts. For nearly five decades, his extraordinary act of compassion remained unknown, even to his own wife. The full story only emerged in 1988 after his wife came across a scrapbook tucked away in their attic. The scrapbook contained the names and photographs of every child he had saved. Winton was knighted in 2003 and lived to be 106 years old, long enough to witness the gratitude of many families whose lives had been forever changed by his actions.

39. Which of the following is closest in meaning to the word “trajectory” in the first paragraph?

- (A) Pattern of behavior. (B) Territorial boundary.
(C) Course of development. (D) Physical transformation.

40. What is the main purpose of the second paragraph?

- (A) To highlight the inefficiency of existing relief groups.
(B) To describe how Winton organized the rescue operation.
(C) To detail the dangers involved in transporting children to safety.
(D) To explain why British families agreed to foster Jewish children.

41. Which of the following is true about Winton’s effort?

- (A) He carried out the rescue mission with official approval.
(B) The scale of the crisis was too overwhelming for him to handle.
(C) He convinced Jewish families to evacuate their children to safety.
(D) The outbreak of World War II prevented some children from escaping.

42. Here is a sentence: “This careful documentation later provided valuable evidence of his heroic action.”

In which paragraph would the sentence most fit?

- (A) Paragraph 1. (B) Paragraph 2. (C) Paragraph 3. (D) Paragraph 4.
