Varieties of Tea

White Tea	Tea leaves undergo minimal processing. Consequently, the brewed tea's flavor is very light. Despite the name, the tea is pale yellow.
Green Tea	The tea leaves are immediately subjected to roasting or pan-frying to prevent any oxidation after being picked. This preserves the original, "grassy" flavor of the tea leaves. Both the tea leaves and tea itself are indeed usually green. Top producing countries are China, Japan, and South Korea.
Oolong Tea	After being picked, the tea leaves are laid out under the sun to undergo oxidation. When the desired oxidation level is reached, the leaves are fired or roasted to halt oxidation. The oxidation level ranges from 5% to 85%. Less oxidation is closer to green tea, and more is closer to black tea. It is mainly produced in China and Taiwan.
Black Tea	Black teas are fully (100%) oxidized. The resulting tea is dark red in color and the flavor profile is bold. Most tea consumed in England and other Western countries is of this variety. India, Sri Lanka, and Poland are the largest producers.
Herbal Tea	Brewed beverages known as "herbal teas" are not true teas. Unlike the above four, they are not made with the leaves of the <i>Camellia sinensis</i> or "tea" plant. Instead, they are made with dried flowers, herbs, fruits, and various other ingredients, containing no caffeine.

NICK'S TEA REVIEWS

Review #302: Sapphire Tea from Alinawik Tea Estate in Sri Lanka

It was in anticipation that I opened my recent tea order from Sri Lanka Tea Merchant containing not just several black tea varieties, for which Sri Lanka is known, but also a new Sri Lankan "green" tea – you'll see below why I've used quotation marks here.

Tea leaves

The leaves are lightly twisted and ash-gray. The color is what first aroused my suspicion about this supposedly green tea. The leaves have a pleasing aroma – I smelled hints of chocolate, fig, and forest.

Brewed tea

After steeping for three minutes, the brew is transparent and light brown, reminiscent of a sandy beach. Again, it is not what I would expect for a green tea. The aroma of the brewed tea differed much from that of the leaves; here I detected cinnamon, nutmeg, and oak. The taste was heavy on cinnamon and brown sugar, with a long-lasting aftertaste.

Conclusion

Nothing about this tasting experience said "green tea" for me. The darker appearance and flavor profile were more oolong-like, though not bold enough to be classified as black. After sleuthing around online, I found that indeed some Sri Lankan tea estates market their specialty teas as green, despite having undergone varying amounts of oxidation.

47. Match the following statements to the correct type of tea. (連連看，5 分)

Could be described as "semi-oxidized."	• White Tea
Strongest flavor profile.	• Green Tea
Incorrectly named as tea.	• Oolong Tea
Retains natural flavor.	• Black Tea
Mildest of the five varieties.	• Herbal Tea

48. 請根據 Nick's Tea Reviews 的內容，從中選出兩個單詞 (word)，填入下列段落的空格，並視語法需要作適當的字形變化，使句子語意完整且符合文意。(填充，2 分)

Tea refers to a beverage that is made by steeping, or (A) _____, leaves of the *Camellia sinensis* plant that have undergone various levels of processing after being picked.

The reviewer became (B) _____ about the way the tea had been classified after he detected traits that weren't typical for that type of tea.

49. What conclusion does the writer of the tea review make? (單選，1 分)

(A) The tea is marketed as green but is in fact black.
(B) The tea is marketed as green but is more like oolong.

The Dakota Access Pipeline was one of the most contested oil pipeline projects in American history. It all started when a 11 oil reserve was discovered in Bakken, North Dakota. Practically overnight, North Dakota became the country's second largest oil source, after Texas, producing one million barrels of oil daily.

To 12 the liquid gold, the Dakota Access company planned an underground pipeline that would travel 1,172 miles before reaching an oil facility in Illinois. Along the way, the pipeline would cross three other states, plus go under the Missouri River. The mostly white residents of Bismarck, a city just downstream, 13. Thus, instead, the company planned for the pipeline to cross the river near the Standing Rock Indian Reservation. This 14 serious concern among the reservation members, who feared that oil might leak into their water supply.

In 2016, the tribe began protesting against the pipeline. Thousands of people from around the country showed up, and many celebrities supported the movement. Over 800 were arrested and 300 injured in the protests. The protesters almost won, but in the end, when Donald Trump took office, he immediately ended the 15. Today, oil flows through Standing Rock land.

Enter any classroom and you're likely to spot a large, rectangular poster displaying a map of the world. But such maps are and always have been 16. The reason is obvious—our planet isn't flat!

For comparison's sake, imagine taking a ball, slicing through one side of it, laying it totally flat on the table, and trying to squeeze it into a rectangular shape. Of course any image on it would become distorted, and that is precisely the case with the typical flat world map. This distortion becomes more pronounced nearer to the poles, 17 land masses appear larger than they really are. 18, on a typical world map, Africa looks smaller than Greenland, when in reality the former is 14.5 times larger than the latter!

The most common flat world map is called the Mercator Projection. The Flemish cartographer Gerardus Mercator developed it in 1569. Since its first use in 19 at sea, it has become the standard world map we are all familiar with. In recent centuries, several attempts have been made to create a more realistic flat map of the world, but none have really 20 yet. The three-dimensional globe remains the best thing we have got!

The United Nations Educational, Scientific and Cultural Organization (UNESCO) has long been known for selecting and helping to protect hundreds of so-called World Heritage Sites around the world. In 2004, the organization 21 a new project called the Creative Cities Network. Rather than focusing on 22 sites or attractions, the network recognizes entire cities that make creativity a priority as they develop. The 23 Creative Cities can belong to one of seven categories: film, literature, music, crafts and folk arts, food, media arts, or design.

In order to be officially labelled a Creative City, several 24 must be met for each category. For example, to be a Design City, that city must have an established and flourishing design industry, major design schools and events, and 25 of creative design in public architecture, planning, transportation, and so on. Singapore, which received the title in 2015, is one example. Despite the city-state's 26, such as lack of resources and space, it had gone above and beyond when it came to design. In 2003, the government established the DesignSingapore Council, which went on to create 27 design-related programs and events. The council is 28 in the National Design Center, while the city also has a design-themed museum, Red Dot. Since being listed, Singapore has continued to expand its design efforts, including participating in ambitious design projects with three Australian cities and hosting a Design Week event 29 by design experts from 15 other Design Cities.

Gaining the Creative City status can have many 30 for a city, from raising the international profile of creative workers in the city and of the city itself to strengthening partnerships with other Creative Cities around the world. So far, around 300 cities in 90 countries around the world have joined the network, and that list continues to grow.

If you look at a map of North America, one of the most obvious features is a series of enormous lakes. 31 From there, they stretch all the way to the central-east and the Atlantic Ocean.

The story of these lakes begins in the Last Glacial Period, also known as the Last Ice Age. From 115,000 to 11,700 years ago, vast glaciers covered much of North America. Known together as the Laurentide Ice Sheet, these glaciers were up to three kilometers deep. 32 Then, as they gradually melted, their waters filled these trenches, forming some of the largest freshwater lakes in the world.

From northwest to southeast, these lakes include the following. Great Bear Lake is the largest lake entirely in Canada and 7th largest freshwater lake in the world. Next is Great Slave Lake, which holds the title for deepest in North America, at 614 meters. Taipei 101 would fit under its surface, with over 100 meters to spare. 33 The latter is what's left of the ancient Lake Agassiz, which 12,875 years ago created a flood so large that it may explain the flood stories in various ancient cultures. Finally, we come to the Great Lakes: Lake Superior, Lake Huron, Lake Michigan, Lake Erie, and Lake Ontario. 34 Lake Superior is so large that it could cover the entire continent with 1.5 meters of water.

In total, the above-mentioned lakes account for around a quarter of all freshwater on Earth. They lie as monumental reminders of just how much our planet can change in a relatively short period of time.

- (A) As they slowly moved, they carved out huge trenches in the land.
(B) Then there are two more giants, Lake Athabasca and Lake Winnipeg in Central Canada.
(C) These are the world's 1st, 3rd, 4th, 10th, and 12th largest freshwater lakes, respectively.
(D) They begin in the north-central portion of the continent, near the Arctic Ocean.

第 35 至 38 題為題組

Culture shock is a well-known and commonly experienced phenomenon. In a nutshell, it refers to the feeling of shock or surprise one experiences when encountering different customs, habits, or practices while traveling or living abroad. Less commonly known or felt, though, is “reverse culture shock” (also called “re-entry shock”), which typically takes place when one re-enters one’s own country or culture after an extended period of being away.

In order for reverse culture shock to occur, the individual must be away from his or her home culture for long enough to have become comfortable in another culture. As a result, that person’s brain “forgets” or is no longer used to certain aspects of his or her own culture. One example would be a man who was born and raised in Australia, where people drive on the left. He then spends 10 years in Turkey, where they drive on the right, and he gets used to that. When he finally returns home, he keeps accidentally driving on the right side of the road, which now feels like the correct side in his mind. Another would be a teenage Japanese girl who studies abroad in the US for one semester. During her time in the US, she becomes **accustomed to** having a lot of freedom. Like her American peers, she enjoys a lot of free time to hang out with her friends after school and on weekends, and there isn’t much pressure to succeed on her exams, even the final ones. After she returns to Japan for grade 12, she finds the pressure and lack of freedom overwhelming.

Surprisingly, reverse culture shock can be even more powerful than culture shock. In contrast to culture shock, which can generally be overcome over time, reverse culture shock can last forever. There is a common saying: “You can’t go home again.” In other words, once you have been abroad, home will never be quite the same again.

35. Which of the following statements is true?

- (A) Reverse culture shock is more likely to occur when you are abroad.
- (B) Culture shock is more likely to occur before reverse culture shock.
- (C) It is possible for culture shock and reverse culture shock to happen at the same time.
- (D) Most people who experience reverse culture shock have never experienced culture shock.

36. What can be learned from the two examples provided of reverse culture shock?

- (A) One has to be away at least a year to experience it.
- (B) There are some strategies for quickly overcoming it.
- (C) It is more common for Western people to experience it.
- (D) The time away before experiencing it varies considerably.

37. Which of the following is closest in meaning to “**accustomed to**” in the second paragraph?

- (A) Adjusted to.
- (B) Fed up with.
- (C) Let down by.
- (D) Annoyed about.

38. What does the quote at the end suggest?

- (A) We should never return to our home after going abroad.
- (B) It is pointless to take long trips around the world or live abroad.
- (C) Creating a new home abroad is the best way to overcome culture shock.
- (D) We shouldn't expect our feelings about home to be the same after traveling abroad.

第 39 至 42 題為題組

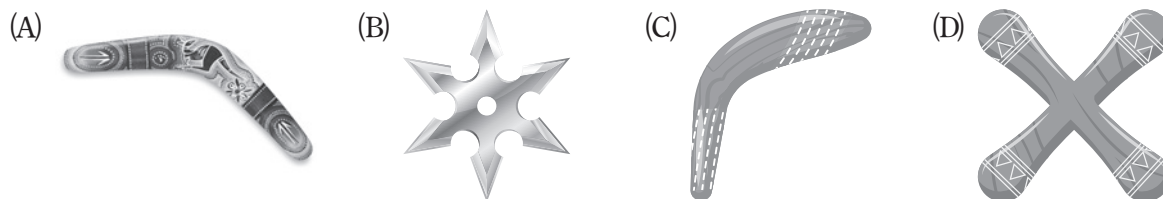

The boomerang, a kind of throwing stick, is undoubtedly one of the most iconic items associated with Australia. Most commonly, a boomerang is made of wood and shaped like a wide letter V. The two symmetrical wings have a curved airfoil shape, which, after being thrown in a spinning manner, causes the boomerang to ascend while moving forward, turn back in a circular motion, then descend and return to be caught by the thrower.

Based on ancient rock art in Australia, use of boomerangs among Australian Aboriginals goes back as early as 50,000 years ago, a staggering 45,000 years before the Great Pyramids of Giza were built. From this artwork, we know that boomerangs were used as a weapon to hunt mammals such as kangaroos, but historical studies show that the Aboriginals also used them as battle clubs, musical instruments, fire-starters, and recreational toys. Boomerangs themselves are an art form, as they are often painted or carved with tribal patterns and imagery. They range in size from 10 to 185 centimeters, though the most common size is in the 25- to 75-centimeter range. In modern times, due to their aesthetic appeal, they have become a popular souvenir item, though the ones sold to tourists are often a non-returning (i.e. purely decorative) variety.

While boomerangs are most often associated with Australian Aboriginals, the tools have been independently invented by numerous cultures around the world. A boomerang made of mammoth tusk and dating to 30,000 years ago has been found in Poland, while ancient inhabitants of South India used them to hunt birds and rabbits. When the tomb of King Tutankhamun, the most famous of ancient Egyptian pharaohs, was discovered, it was found to contain an impressive collection of boomerangs.

Today, boomerangs come in a variety of designs, occasionally with three or even four wings. There are boomerang throwing competitions, and several astronauts have tested and proven that boomerangs function identically under zero gravity.

39. Which of the following shows a common boomerang, as described in the passage?

40. Which of the following is **NOT** mentioned in the passage as a possible use for a boomerang?

- (A) As jewelry.
- (B) To strike others.
- (C) As a decoration.
- (D) For killing wildlife.

41. Which of the following words are used in the passage to refer to the boomerang?

- a. tomb b. club c. tool d. thrower e. variety f. weapon
- (A) a, b, c, f
- (B) b, c, d, e
- (C) c, d, e, f
- (D) b, c, e, f

42. Which of the following statements is true about boomerangs?

- (A) They are never larger than one meter in size.
- (B) They move in a different way in outer space.
- (C) They can be made of materials besides wood.
- (D) Their distribution is limited to Asia and Australia.

第 43 至 46 題為題組

Around 20 million years before dinosaurs first appeared, another fascinating group of animals went extinct. Amazingly, these creatures had thrived for some 270 million years, a full 100 million years longer than the dinosaurs ruled the Earth, and 1,350 times longer than anatomically modern humans have been around. The animal in question is none other than the trilobite.

Trilobites were an early marine arthropod, or invertebrate animal whose body consisted of joined segments (a modern example is the crab). The trilobite's three segments were its cephalon (head), thorax (body), and pygidium (tail). The "tri" in the creatures' name refers not to these three top-to-bottom segments but to its three side-to-side lobes: left, axial, and right. In the course of their long history, they evolved to occupy many environments, starting out as bottom-feeders in the ocean, then swimming around, and finally walking on land. Because of their hard, external skeleton, they left an extensive fossil record, which is why we know so much about them today, despite their incredible age.

Scientists aren't so clear on what the trilobite's ancestor was, but some theories point to the Spriggina. True trilobites first evolved 540-520 million years ago (mya). They diversified rapidly, but several species went extinct at the end of the Cambrian period (541-485 mya). During the Ordovician (488-444 mya) and Silurian (444-416 mya) periods, there were fewer species, but the ones that did survive tended to be larger and better at exploring beyond the ocean floor. Then, after the Devonian period (416-359 mya), only a single species group of trilobites, called the Proetida, survived into the Carboniferous period (359-299 mya), finally disappearing from the fossil record at the end of the Permian (251 mya).

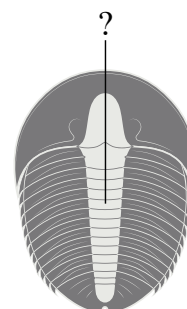

To date, over 20,000 species of trilobite have been identified. Their sheer variety and awesome endurance through multiple mass extinctions makes them one of the most successful animal groups the world has ever seen.

43. Why does the author compare trilobites with humans in the first paragraph?

- (A) To emphasize how durable trilobites were.
- (B) To show how different they are anatomically.
- (C) To point out that dinosaurs lived in the middle.
- (D) To argue that trilobites were physically stronger.

44. Which part of the trilobite is the line pointing to in the diagram?

- (A) Thorax.
- (B) Cephalon.
- (C) Pygidium.
- (D) Axial lobe.

45. In what order did trilobites undergo the following?

- | | |
|---------------------------------|----------------------------|
| a. Become more mobile. | b. Die off and go extinct. |
| c. Evolve to numerous species. | d. Reduce to one species. |
| e. Appear in the fossil record. | |
- (A) a → b → d → c → e
 - (B) c → e → a → d → b
 - (C) e → c → a → d → b
 - (D) e → a → c → d → b

46. Which of the following does the author **NOT** use to demonstrate how remarkable trilobites were?

- (A) Their ability to survive.
- (B) The length they existed.
- (C) Their number of species.
- (D) Their awesome appearance.

According to the most recent data, there are approximately 1.5 billion vegetarians in the world, accounting for nearly 20% of the global population. While many adopt a vegetarian diet for religious reasons, especially in India, the number of people who do so elsewhere for personal reasons is much larger than it once was. However, there is a fair bit of variety within the vegetarian community. Below, we look at three of the most common types of vegetarianism.

Lacto-ovo vegetarianism is a diet that excludes meat and seafood but allows for the consumption of dairy and egg products (in Latin, <i>lacto</i> refers to the former and <i>ovo</i> to the latter). In Western culture, generally speaking, this is the most common type of vegetarianism, and when a Western person describes himself or herself as vegetarian, he or she is most likely lacto-ovo vegetarian. In other words, the phrase “lacto-ovo” is seldom spoken but usually implied or assumed. Reasons cited for adopting lacto-ovo vegetarianism vary widely, from protecting the environment and reducing harm to animals to being healthier and simply finding the taste or texture of meat unappealing.	Buddhist vegetarianism is a uniquely East Asian phenomenon. According to Buddhism, all living things are interconnected, and an animal could have been one’s mother in a past life. The Buddhist vegetarian diet lies somewhere between veganism and lacto-ovo vegetarianism; some Buddhist vegetarians eat or drink dairy products, but most avoid eggs. Yet what sets Buddhist vegetarians apart is their avoidance of the five “pungent” vegetables: onions, garlic, chives, green onions, and leeks. These are thought to “stir” the emotions and make contemplation more difficult. While many monks, nuns, and elderly follow this diet, it is important to note that most Buddhists practitioners in East Asia actually don’t.	Veganism has undoubtedly been the trendiest type of vegetarianism in the last decade. This more extreme diet involves the avoidance of all animal-derived products. For example, a vegan would not eat bread if casein, a type of protein that comes from milk, was listed as one of its ingredients. Because they try to avoid using animal products in general, not just in their diet (for example, they might avoid wearing leather shoes), many describe veganism as not just a diet but a lifestyle. With the rapid growth of veganism in the West, a huge number of vegan products have been launched, such as vegan mayonnaise, turkey, watches, and much more. There are also many subcategories of veganism; for example, “raw” vegans only eat uncooked plant-based foods.

Ever since the 1960s, several North American sports teams have come under fire for their use of what are considered racist team names and mascots. The main argument against them is that they are examples of “cultural appropriation,” that is, the 11 of components of one culture by another without acknowledgment or compensation.

There are some early examples of team names consisting of racial slurs for Blacks, Asians, or Arabs, but 12 the most common are ones relating to Native American peoples. Just a few examples were the Washington “Redskins” (a racist term implying that native people have “red” skin), Dickinson State University “Savages” (an offensive word that suggests native people are uncivilized), and the Edmonton Eskimos (an outdated term for the Arctic Inuit people).

13 the above-mentioned teams have all changed their names, many other major professional teams continue to use ones relating to Native Americans, such as Cleveland Indians, Chicago Blackhawks, and Kansas City Chiefs. Some teams also 14 their use of mascots resembling Native American peoples. These names and mascots remain highly 15 and are considered insulting to the continent’s original people, who over the last 500 years have seen their land stolen, people murdered, and treaties violated.

The uvula, the mass of flesh that hangs at the back of our throat, has been the subject of debate for centuries. What is its purpose, and why do no other animals have one?

In the past, some cultures regarded the uvula as a(n) 16 hazardous organ which could cause sudden infant death, and thus removed it at birth. Even today, it is sometimes removed to treat breathing issues during sleep. 17, the uvula helps us in several different areas of our daily lives, from speaking to eating.

First, the uvula plays an important role in the pronunciation of certain sounds, especially in languages like French and Arabic. Second, the uvula produces large amounts of saliva, which helps moisten the throat while people speak. As a result, people who have had their uvula removed

often complain of having a 18 throat. Third, the uvula prevents food from going up into the nasal cavity when it is 19.

These functions show that the uvula is 20 pointless. Rather, it is a highly evolved organ that serves multiple purpose, helping make humans what we are.

It often seems like the super-rich are continuing to get richer. In 1999, Microsoft founder Bill Gates became the first person to reach a net worth of \$100 billion. Amazon founder Jeff Bezos 21 that figure in 2020, while Tesla founder Elon Musk reached \$250 billion just two years later. From these figures, one might assume that these are the richest men in history, but that assumption would not be entirely correct.

In fact, with 22 taken into account, there have been richer people in the past. John D. Rockefeller, who established the Standard Oil Company and was its largest shareholder, was the first person to ever reach \$1 billion in personal wealth. However, if his worth at the end of his life were 23 into the modern-day equivalent, it would amount to \$360 billion, making him the richest person in American history.

Going back to antiquity, it becomes a little more difficult to measure wealth, because 24 lands were often considered part of a ruler's personal wealth. Keeping this in mind, some historians consider that Musa I of Mali, Africa was the 25 person ever. Musa I, the 10th ruler of the Mali Empire (1280-1337), made much of his vast fortune by exploiting his country's resources, namely gold and salt. Musa I was known for giving gifts of gold so valuable that they dramatically 26 the price of the metal across North Africa. A rough 27 puts his modern day-equivalent wealth at approximately \$400 billion.

Even further back, in ancient Rome, the emperor Augustus was thought to own 25-30% of the world's economic 28, including personally owning all of Egypt. *TIME Magazine* once calculated that his wealth would be equal to \$4.6 trillion (that's 4,600 billion!) in today's 29. However, some historians have pointed out that these figures can hardly be 30. After all, it's virtually impossible to evaluate wealth in the distant past.

Auroras, also known as aurora polaris or polar lights, are vivid, naturally occurring colored light displays in the sky. 31 Those in the Arctic region are referred to as aurora borealis, or Northern Lights, and those in the Antarctic region referred to as aurora australis, or Southern Lights.

32 The lights tend to come in waves, dancing in the sky as they paint patterns akin to flowing curtains, spirals, rays, flickers, or clouds. Green is the most common color and takes place at lower altitudes. Blue is usually even lower, while red is usually indicative that the display is taking place higher in the atmosphere. Although auroras are primarily a visual phenomenon, numerous observers report that they also make a sound. It comes as a faint crackling noise typically heard when directly overhead. While auroras occur throughout the year, they are only visible to the naked eye in winter, when the sky becomes sufficiently dark for long enough.

While scientists' understanding of auroras is incomplete, what causes them is relatively known. In brief, the lights are brought about by the interaction of solar winds, or streams of charged particles released from the sun's atmosphere, with the Earth's magnetic fields. These charged electrons and neutrons collide with gasses in the Earth's upper atmosphere, producing tiny bursts of light. 33 The Earth's magnetic fields generally steer the particles toward the North and South Poles, which is why the displays take place in those regions.

34 The ancient Chinese called them the "Sky Dog," while some Native Americans believed they represented the spirits of the departed.

- (A) To witness the phenomenon can be described as nothing short of mystical.
(B) Owing to their sheer beauty, it's no wonder many early civilizations attributed magical properties to auroras.
(C) As the name suggests, they are limited to the Earth's polar regions.
(D) When billions of these impacts occur in sequence, it produces auroras.

第 35 至 38 題為題組

Few people have questioned the old proverb “Laughter is the best medicine,” and objective, scientific analysis really does back it up. It helps to first examine what exactly happens when we chuckle. Laughter, which is limited to humans and other primates, is an involuntary response that starts in the brain’s frontal lobe. The lobe is divided into two parts: left, the practical side, which processes language, and right, the creative side. The former is what identifies potentially humorous situations, while the latter’s job is to then decide whether that person actually finds it worth laughing at or not. The frontal lobe can’t actually make us laugh, though; that task belongs to the limbic system, the part of the brain which handles our behavioral and emotional responses. Once the limbic system gets the go-ahead, it sets in motion the physical process of laughter throughout the body.

In the short term, this physical process includes the release of endorphins, which make us feel good, increase intake of oxygen, and stimulate the heart, lungs, and muscles. The process first activates and then overcomes our body’s stress response by decreasing cortisol, the “stress hormone,” resulting in an overwhelming sense of relaxation and reduction of tension in the muscles. In the long term, regular laughter has been found to improve the body’s immune system, relieve chronic pain, alleviate depression, and increase both self-esteem and overall life satisfaction.

Starting in the 1960s, a number of spiritual teachers embraced the idea that humans can engage in voluntary laughter for meditative or healing purposes. For example, the Indian guru Rajneesh taught his followers a kind of “dynamic meditation” involving 10 minutes of rapid breaths through the nose followed by “letting whatever happens happen,” whether that be shouting, jumping, shaking, or wild laughter. In the 1990s, Indian physician Madan Kataria drew on the ideas of those **pioneers** and created Laughter Yoga International. The organization now has over 5,000 chapters worldwide, in which members practice yoga with forced laughter. According to one member, “the mind does not know that we are faking it,” giving people the same physical benefits acquired from regular laughter.

35. In what order do the following events occur?

- a. The need for a laughter response is determined.
- b. The existence of a possibly funny situation is noted.
- c. Funny words or a funny situation occur.
- d. Physical movements occur and endorphins are released.

(A) $d \rightarrow c \rightarrow b \rightarrow a$

(B) $c \rightarrow b \rightarrow d \rightarrow a$

(C) $c \rightarrow b \rightarrow a \rightarrow d$

(D) $a \rightarrow b \rightarrow d \rightarrow c$

36. What positive effect of laughter is **NOT** mentioned?

- (A) Burning calories.
- (B) Improving mood.
- (C) Energizing organs.
- (D) Easing muscle tightness.

37. What does “**pioneers**” in the third paragraph refer to?

- (A) Settlers.
- (B) A guru’s followers.
- (C) Over 5,000 chapters.
- (D) A number of spiritual teachers.

38. What is suggested about voluntary laughter?

- (A) It is not as effective as involuntary laughter.
- (B) It doesn’t exist, because laughter is involuntary only.
- (C) It can have the same impact as involuntary laughter.
- (D) It is always accompanied with shouting, jumping, and shaking.

第 39 至 42 題為題組

The Rubik’s Cube is the world’s most recognizable three-dimensional puzzle. It takes its name from Ernő Rubik, the Hungarian architect who invented it in 1974 and sold it to toy manufacturer Ideal Toy Corp in 1980. Its release sparked a craze in the early 1980s, but sales plummeted around 1983, staying that way until a Rubik’s Cube revival in the early 2000s. To date, more than 350 million Rubik’s Cubes have been sold, making it one of the world’s bestselling toys, up there with Barbie dolls and Hot Wheels cars.

This classic toy is more complex than initially meets the eye. One puzzle consists of 26 individual cubes, each referred to as a “cubelet” and measuring 1.9 cm by 1.9 cm, for a total length and width of 5.7 cm on each face of the puzzle. Each face has nine cubes, and there are six possible faces in the cube at any given time (three horizontal and three vertical). Each cubelet conceals an inner mechanism that permits it to not only interlock with other cubelets but also be moved when the player spins an entire face. The six faces are attached to an inner core, around which they can rotate on three different axes. The outer face of each cubelet is one of six colors (red, yellow, green, blue, orange, or white). The goal is to spin the various faces until each visible face of the cube is uniformly one of the six colors.

Incredibly, there are 43 quintillion (that’s 43 followed by 18 zeros!) possible color combinations on the toy. It hence comes as no surprise that there are numerous ways to solve the puzzle. One method, considered the easiest, is to start by creating a white cross on one face, then filling in the corners to create a solid white face. From there, the process gets more complicated, involving algorithms that are beyond the scope of this article. Because of all the calculations and forward thinking that solving a Rubik’s Cube requires, it is widely considered a brain-training tool and solving one quickly a sign of advanced intelligence.

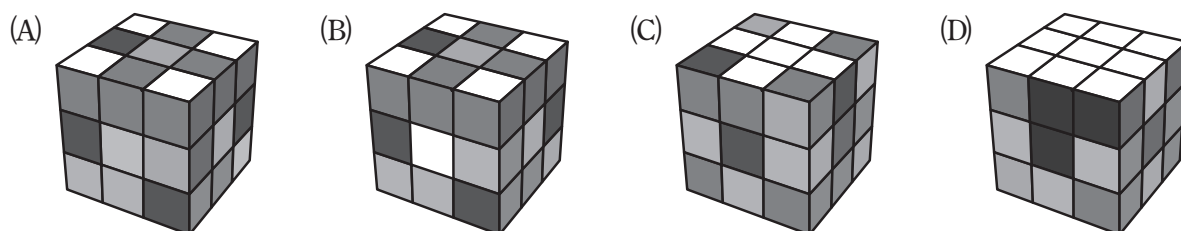

39. What is **NOT** covered in the passage?

- (A) A history of the puzzle.
- (B) The name origin of the puzzle.
- (C) Basic puzzle components and design.
- (D) Complete steps for solving the puzzle.

40. Why does the author mention the total number of color combinations?

- (A) This information holds the secret to solving the puzzle.
- (B) To explain why so many Rubik's Cubes have been sold.
- (C) To help the reader further understand what the toy looks like.
- (D) To make it easier to understand that there's no single solution.

41. What is the first step to solving a Rubik's Cube in the most elementary manner?

42. What does the passage suggest about the Rubik's Cube?

- (A) It doesn't require much intelligence to solve.
- (B) It might appear simple at first, but it's actually not.
- (C) It is surprisingly easy for toy companies to manufacture.
- (D) It is more popular than Barbie and Hot Wheels combined.

第 43 至 46 題為題組

When comparing different regional versions of Buddhism, Tibetan Buddhism strikes many as particularly unique. This is in part due to the fact that Buddhists in Tibet practice a form of Buddhism called Vajrayana, or “the way of the diamond,” which differs significantly from Theravada (the form practiced primarily in Southeast Asia) and Mahayana (the form practiced primarily in China and East Asia). Another reason is that the Tibetan form has been heavily influenced by Bon, the indigenous folk religion of Tibet.

Originally, Bon was an animistic religion, meaning that **adherents**, called Bonpo, believed all things, living or not, possessed a soul. At the time, they didn't consider Bon a religion but a set of traditions. The priest himself was called a Bon, and his role was to conduct rituals, such as sacrificing animals, to assist humans to make their journey to the afterlife upon dying. He also guided the people in keeping the many spirits of the world happy and avoiding places with dangerous forces—keep in mind that the Tibetans inhabit a hostile, high altitude environment.

When Buddhism first entered Tibet in the 8th century AD, it was seen as a foreign religion. Popular legend has it that Padmasambhava, the Indian master credited with introducing the religion, defeated the Bon demons and made them protectors of Buddhism. In reality, what happened is that many elements of Bon were incorporated into what over the centuries came to be Tibetan Buddhism. These included traits like deep-throat chanting, placing colorful prayer flags in sacred locations, and an emphasis on rituals related to the phase between death and the afterlife.

To make things more complex, Bonpo actually did begin to see Bon as a religion, starting from around the 10th century. Moreover, just as Tibetan Buddhism borrowed practices and ideas from earlier Bon, the “New Bon” absorbed much from Buddhism. Bon still exists today but has changed much over the centuries to the point that it becomes difficult to identify which aspects of Bon came from Buddhism, and vice versa.

43. What is **NOT** mentioned in the first paragraph?

- (A) When the Bon religion emerged.
- (B) Why Tibetan Buddhism is distinct.
- (C) What kind of Buddhism is practiced in Tibet.
- (D) Where different forms of Buddhism are found.

44. Which of the following is closest in meaning to “**adherents**” in the second paragraph?

- (A) Followers.
- (B) Composers.
- (C) Immigrants.
- (D) Professionals.

45. What can be inferred about Padmasambhava?

- (A) He was an expert at throat chanting.
- (B) He conquered Tibet on behalf of India.
- (C) He is highly regarded by Tibetan Buddhists.
- (D) He converted to the Bon religion later in his life.

46. Which of the following might the author use to describe the relationship between Bon and Buddhism?

- (A) Violent.
- (B) Romantic.
- (C) Non-existent.
- (D) Complicated.

第 47 至 50 題為題組

Anthropocene epoch

The Anthropocene is a proposed geological epoch that begins at the point when humans began to have a significant impact on the Earth. Epochs are periods of time that are separated by major changes in global geology. The basic argument for the Anthropocene is that humans have changed the Earth so profoundly that the current period should be regarded as a new epoch. The word is derived from *anthropo*, meaning “human” in ancient Greek. The Anthropocene is not universally accepted, though. Some experts argue that we are still in the Holocene, or “wholly recent” epoch, which began at the end of the last ice age.

<i>National Geology Magazine Interview Series</i>	
Week #5 Topic: Are we in the Anthropocene?	
Expert #1: Ben Cowan (BC)	Expert #2: Emelia Mackenzie (EM)
Q: Anyone who has read your books knows that you are a major supporter of the Anthropocene. What are the biggest arguments for it?	Q: In your recent viral article, you argue against the concept of the Anthropocene. Why?
BC: There’s absolutely no doubt that humans have reshaped the planet to the point that it will be visible in the geological record for millions of years to come. We’ve destroyed habitats, introduced invasive species to different continents, acidified the ocean, caused climate change, and killed off thousands of species.	EM: My main issue with the proposition that we are living in a “new” epoch is the time frame. Epochs don’t just come and go overnight. In geological time, the human period is a fraction of a second. We should call it an “event,” not an “epoch.”
Q: When exactly did the Anthropocene begin?	Q: But haven’t humans changed the world enough for it to be considered a new epoch, even if it’s short?
BC: Epochs don’t begin and end so suddenly. For example, the dinosaurs had already been in decline for 10 million years before the asteroid finished them off and ended the Cretaceous period. However, I think we are in unusual times. Humans have accelerated geological history, and I argue that the Industrial Revolution is the biggest turning point.	EM: I don’t think so. Consider this: the Himalaya mountains grew in 50 million years, while 200 million years ago, all the Earth’s continents were joined together in a supercontinent. This is the kind of scale we’re talking about when we discuss geological history. Human impact on the environment might seem big from our perspective, but from the planet’s, I don’t think it will leave enough of a mark to justify a new epoch.

47. Which of the following statements about the Anthropocene epoch is true? (單選，2 分)

- (A) It started approximately 10 million years ago.
- (B) It is more or less accepted by all geological experts.
- (C) It is named after the ancient Greeks, or *anthropo* people.
- (D) It blames humans for something that normally happens naturally.

48. 請根據選文及訪談內容，從中選出兩個單詞 (word)，分別填入下列段落的空格，並視語法需要作適當的字形變化，使句子語意完整且符合文意。(填空，2 分)

According to one of the two experts, the current period in which our planet has experienced great changes due to humans should be seen as just an event, given that humans have lasted less than a (A) _____ in terms of geological time. It is therefore not reasonable to propose the concept of a new geological (B) _____ in Earth’s history.

49. Which phrase in Ben Cowan’s interview means “a time when a major change occurs all of a sudden”? (簡答，2 分)

50. 請根據選文內容，判斷兩位專家是否同意下面表格左方所列的論述，並在對應的方框中打勾。(4 分)

Statement	Ben Cowan	Emelia Mackenzie
The Anthropocene is an invalid epoch.		
There is highly conclusive evidence that humans have permanently altered the planet.		
Epochs usually change over the course of extended, not brief, periods of time.	✓ (示範)	✓ (示範)
The Anthropocene is an exception because human impact is so dramatic.		
The traces of human impact won’t stand the test of time.

二、綜合測驗

11 ~ 15 題

達科塔輸油管工程（Dakota Access Pipeline）是美國歷史上最具有爭議的輸油管線計畫之一。一切始於在北達科塔州的巴肯發現了一個重大石油區。幾乎是一夕之間，北達科塔州成為僅次於德克薩斯州的美國第二大石油來源，每日生產 100 萬桶石油。

為了運輸液態黃金，Dakota Access 公司規劃了一條行經 1,172 英里的地下管線，終點為伊利諾伊州的儲油廠。一路上，管線會橫跨其他三州，並穿入密蘇里河下方。位於下游城市的俾斯麥，其居民大多數為白人，對此工程表示反對。因此，該公司改而計畫將管線穿過鄰近印第安立岩族保留區的河流。這引起了保留區居民極大的憂慮，他們擔心

石油可能會外漏流入他們的供水系統。

2016 年，立岩族部落開始抗議管線工程。美國各地有數千人到場聲援，許多名人也支持這起運動。抗議活動中有超過 800 人被捕、300 多人受傷。抗議者就快贏得勝利，但最後卻在川普就任總統時，他立即終止管線工程的爭議。今日，石油流經立岩族的土地。

11. (A) 重大的 (B) 穩定的 (C) 適當的 (D) 肥沃的
說明：此題考上下文語意，從下一句 the country's second largest oil source，僅 major「重大的」符合文意。故選 (A)。
12. (A) 解決 (B) 採購 (C) 運輸 (D) 加工
說明：本題考細節。整合句中的 pipeline、traveled、reaching 等字的資訊，可選出 (C) transport。
13. (A) 獲得管線的使用權 (B) 對此計畫表示反對 (C) 與公司合作 (D) 尋求部落族人的許可
說明：此題考上下文語意，從下兩句 oil might leak into their water supply 可知工程具有風險可能會危害居民生活，整合文意可推測白人居民反對工程，故選 (B) 符合其後 Thus 所引出的文意：因白人反對而導致管線改道。
14. (A) 傳達 (B) 引發 (C) 確保 (D) 使……變得……
15. (A) 爭論 (B) 任務 (C) 前景 (D) 操作
說明：全文討論具爭議的輸油管線計畫，本題與首段 the most contested oil pipeline projects 呼應，故選 (A) dispute。

重要字詞

contested *adj.* 具爭議的practically *adv.* 幾乎barrel *n.* 桶facility *n.* 設施；場所voice *v.* 表達objection *n.* 反對reservation *n.* (印地安人) 居住保留區leak *v.* 漏supply *n.* 供應tribe *n.* 部落celebrity *n.* 名人

16 ~ 20 題

進入任何教室，你很可能會看到一張展示世界地圖的巨大長方形海報。不過這種地圖一直是有瑕疵的。原因很明顯——我們的地球並不是扁平的！

為了方便比較，想像拿一顆球，切開一邊，將它完全平放在桌上，然後試著把它擠成一個長方形。球面上的任何圖像當然都會變形，而典型的平

面世界地圖正是如此。這種變形狀況在接近兩極時會變得更加明顯，在極區的陸地看起來比實際更大。例如：在典型的世界地圖上，非洲看起來比格陵蘭小，但事實上前者比後者大 14.5 倍！

最常見的平面世界地圖稱為麥卡托投影。法蘭德斯製圖師 Gerardus Mercator 於 1569 年研製出此地圖。自從首次用於海上導航後，已成為我們所熟悉的標準世界地圖。近來幾個世紀中，人們曾多次嘗試製作更為真實的世界平面地圖，但都未曾真正流行起來。立體地球儀仍然是無可匹敵！

- 16.(A) 有瑕疵的 (B) 被否認的 (C) 應用的
(D) 修改的

17.本題測驗關係子句，where 為關係副詞，意義是 there（更接近極區之處），有連接詞功能，引出形容詞子句，說明前面的名詞 the poles。

- 18.(A) 乍看之下 (B) 相較之下 (C) 理論上
(D) 例如

說明：此句以非洲與格陵蘭的實例說明前句 land masses appear larger than they really are，故選 (D)。

- 19.(A) 分配 (B) 接觸 (C) 參考 (D) 導航
20.(A) 開始 (B) 盛行 (C)（經濟等）好轉
(D)（結果等）出來

重要字詞

rectangular *adj.* 長方形的
distorted *adj.* 變形的；扭曲的
pronounced *adj.* 明顯的
projection *n.* 投影
navigation *n.* 導航
catch on 流行；盛行
three-dimensional *adj.* 3D 立體的

三、文意選填

21 ~ 30 題

聯合國教科文組織（UNESCO）長期來以挑選及協助保護全球各地數百個所謂的「世界遺產地」而聞名。2004 年，聯合國教科文組織發起了一項名為「創意城市網絡（Creative Cities Network）」的新計畫。這個網絡並非著重於單個地點或景點，而是認可在發展過程中能把創造力視為首要之務的整座城市。被評選出的創意城市可屬於以下七種類別的其中一類：電影、文學、音樂、手工藝和民間藝術、食品、媒體藝術或是設計。

為了正式得到創意城市的稱號，各類別的城市都必須符合數項要求。舉例來說，要成為設計城市，該城市就必須擁有成熟且蓬勃發展的設計產

業、主要的設計學校和活動，以及在公共建築、規畫、交通運輸等方面皆展現出創意設計的證據。於 2015 年獲得設計城市之名的新加坡就是一例。儘管這個城市國家面臨著資源短缺及空間不足等挑戰，但在設計方面並未因此受限。新加坡政府於 2003 年成立新加坡設計理事會，其繼續創建了許多與設計相關的計畫和活動。新加坡設計理事會設置於國家設計中心內，而新加坡也還有一座以設計為主題的博物館——紅點博物館。自從被列為設計城市後，新加坡持續擴展在設計方面的努力成果，包含與三個澳洲城市共同參加目標宏遠的設計計畫，並且主辦設計週活動，將有來自其他 15 個設計城市的設計專家蒞臨。

獲得創意城市的地位可以為城市帶來許多益處，從提高城市中的創意工作者及城市本身的國際形象，至強化與世界其他創意城市的合作夥伴關係皆是。到目前為止，有來自全球 90 個國家的大約 300 個城市已加入創意城市網絡的行列，而這份名單仍在繼續擴增中。

22.由於空格前方有 rather than，可知前後子句應有兩種事物相比較或語意對比，而後子句提到 entire cities「整座城市」，可推測此處應為 individual「單個的」地點或景點。

23.此題可從文意判斷，the chosen Creative Cities 呼應第一句的 selecting...hundreds of so-called World Heritage Sites。

重要字詞

select *v.* 挑選
launch *v.* 發起；推動
entire *adj.* 整個的
priority *n.* 首要之事
meet requirements 符合要求
city-state *n.* 城市國家
resource *n.* 資源
house *v.* 設置；安置
expand *v.* 擴展
ambitious *adj.* 目標宏遠的；雄心壯志的
host *v.* 舉辦
status *n.* 地位
profile *n.* 形象
partnership *n.* 合作關係

四、篇章結構

31 ~ 34 題

如果你看著北美洲地圖，最明顯的特徵之一就是一連串的廣大湖泊。它們始於大陸的中北部，靠近北極海。從那裡，它們一路延伸至中東部和大西洋。

這些湖泊的故事始於末次冰河期，也稱為末次冰期。自 115,000 到 11,700 年前，龐大的冰河覆蓋了北美洲的大部分區域。這些冰河合稱為勞倫臺德冰層，深度可達三公里。隨著冰河緩慢移動，在大地上刻鑿了巨大的壕溝。接著，由於冰河逐漸融化，冰河水填滿了這些溝渠，形成一些世界上最大的淡水湖。

從北美洲的西北到東南部，包含以下這些湖泊：大熊湖，是加拿大境內最大的湖泊，也是世界第 7 大淡水湖。再來是大奴湖，其 614 公尺的深度讓它擁有北美最深湖泊的稱號。將臺北 101 放進大奴湖的湖面下，還會多出 100 多公尺的水深才會碰底。然後尚有兩個巨湖：加拿大中部的亞大巴斯卡湖及溫尼伯湖。後者是古代亞加西湖的遺跡，12,875 年前，亞加西湖引發巨大洪水，其水患大到可以解釋在各個古代文化中流傳的洪水故事。最後，我們來到五大湖：蘇必略湖、休倫湖、密西根湖、伊利湖以及安大略湖。這些湖分別是世界第 1、第 3、第 4、第 10 以及第 12 大淡水湖。蘇必略湖極為廣闊，其湖水量多到可以覆沒整個大陸 1.5 公尺深。

總而言之，上述湖泊約占地球淡水總量的四分之一。這些湖泊永遠提醒著，我們的星球可以在相對短暫的時間內發生多麼大的變化。

重要字詞

五、閱讀測驗

35 ~ 38 題

文化衝擊是一種眾所周知且普遍存在的現象。簡單來說，這是指一個人在國外旅行或生活期間，遇見不同的習俗、習慣或做法，所經歷震驚或驚奇的感覺。然而，較少人知道或感受到的是「反向文化衝擊」（也稱為「重新進入衝擊」），這通常發生在一個人在外很長一段時間後，重新進入自己的國家或文化之際。

要出現反向文化衝擊，那個人必須離開他或她的家鄉文化夠長的時間，在另一個文化中已適應良好。因此，那個人的大腦「忘記」或不再習慣於自己文化的某些方面。其中一例是一名在澳洲出生長大的男子，而澳洲人是左側駕車。這名男子後來到土耳其住了 10 年，土耳其人為右側駕車，而他也已習慣了土耳其人的駕車習慣。當他終於返回家鄉，他一直不小心開到道路的右側，感覺就像現在在他心目中，右側才是正確的。另一個例子是在美國就學一學期的日本少女。在美國期間，她習慣了擁有許多自由。就和她美國的同儕一樣，她喜歡在放學後和週末有很多空閒時間和朋友處在一塊；要通過考試也沒有太大的壓力，就算是期末考。而她回到日本上 12 年級後，卻發現壓力奇大，嚴重缺乏自由。

令人驚訝的是，反向文化衝擊可能比文化衝擊力道更強。與文化衝擊相反，文化衝擊大致可以隨著時間克服，但反向文化衝擊可永久不散。俗話說：「你再也回不了家了。」換句話說，一旦你出了國，家就再也不會完全一樣了。

35. 下列敘述何者正確？

- (A) 反向文化衝擊比較有可能在出國時發生。
- (B) 文化衝擊比較有可能在反向文化衝擊前發生。
- (C) 文化衝擊和反向文化衝擊有可能同時發生。
- (D) 大多數經歷反向文化衝擊的人從未體會過文化衝擊。

36. 從反向文化衝擊的兩個例子中可以學到什麼？

- (A) 必須離開至少一年才能體驗反向文化衝擊。
- (B) 有一些策略可快速克服反向文化衝擊。
- (C) 西方人更常體驗反向文化衝擊。
- (D) 每個人要體驗反向文化衝擊前，所需離開的時間長短差別極大。

37. 以下何者與第二段的「accustomed to」含義最接近？

- (A) 適應了……。
- (B) 受夠了……。
- (C) 因……失望。
- (D) 被……惹怒。

38. 文末引用的俗語暗示什麼？

- (A) 我們出國後就不應該回家。
- (B) 在世界各地長途旅行或在國外生活是沒有意義的。
- (C) 在國外建立新家園是克服文化衝擊的最佳辦法。
- (D) 我們不該在出國旅行返回後，期待家園的感覺完全如初。

重要字詞

culture shock *n.* 文化衝擊

in a nutshell 簡單來說

reverse *adj.* 反向的

extended *adj.* 延長的

accustomed (to...) *adj.* 習慣於

overwhelming *adj.* 難以招架的；壓倒性的

39 ~ 42 題

迴力鏢是一種投擲棒，無疑是與澳洲相關最具代表性的物品之一。最常見的迴力鏢是以木頭製成，形狀宛如一個寬口的英文字母 V。對稱的雙翼具有彎曲的機翼形狀，此形狀讓迴力鏢在以旋轉方式拋出後，會於前進的同時上升，再以繞圈方式轉回，然後下降返回由投擲者抓住。

根據澳洲的古岩石藝術，澳洲原住民使用迴力鏢的歷史可以追溯到 50,000 年前之遠，比建造吉薩大金字塔更早了 45,000 年，相當驚人。我們從岩石藝術中可得知，迴力鏢是用來作為狩獵像是袋鼠等哺乳動物的武器，但歷史研究顯示原住民也將它們當作戰鬥棍棒、樂器、點火器以及娛樂玩具。由於迴力鏢經常被繪製或刻上部落紋路和圖像，本身就是一種藝術形式的呈現。迴力鏢的尺寸從 10 至 185 公分不等，但最常見的則是落在 25 至 75 公分之間。在現代，因迴力鏢具有藝術感的外形迷人，已成為廣受歡迎的紀念品，儘管賣給遊客的往往是無法返回（即純裝飾用）的類型。

雖然迴力鏢最常與澳洲原住民聯想在一起，其實這類工具在世界各地的許多文化中已有獨立發明。在波蘭，發現了可溯及 30,000 年前以猛獁象牙製成的迴力鏢；而南印度的先古居民則是用來捕獵鳥類和兔子。當古埃及最著名的法老王——圖坦卡門國王的陵墓被發掘而出時，裡頭也發現收藏著令人印象深刻的迴力鏢。

時至今日，迴力鏢有各式各樣的設計，偶爾會有三或甚至四個鏢翼。迴力鏢也有投擲競賽，幾名太空人已測試並證實了在零重力的環境中，迴力鏢的作用依舊相同。

39. 下列哪一張圖片呈現的是如文章所述常見的迴力鏢？

40. 下列何者不是文章中提到迴力鏢可能的用途？

- (A) 作為首飾。
- (B) 打擊他人。
- (C) 作為裝飾。
- (D) 殺死野生動物。

41. 下列哪些詞彙在文章中用來指涉迴力鏢？

- a. 陵墓 b. 棍棒 c. 工具
- d. 投擲者 e. 類型 f. 武器
- (A) a, b, c, f (B) b, c, d, e
- (C) c, d, e, f (D) b, c, e, f

42. 下列關於迴力鏢的敘述何者正確？

- (A) 它們的大小從不會超過一公尺。
- (B) 它們在外太空以不同的方式運動。
- (C) 它們除了木材也可以用其他材料製成。
- (D) 它們的分布僅限於亞洲和澳洲。

43 ~ 46 題

大約在恐龍首次出現的 2 千萬年前，有另一群可愛的動物絕種了。令人驚訝的是，這些生物曾繁盛長達約 2.7 億年，比稱霸地球的恐龍多了整整 1 億年，比解剖學上的現代人類存在的時間長了 1,350 倍。在此討論的動物正是三葉蟲。

三葉蟲是一種早期的海洋節肢動物或無脊椎動物，身體由連接的體節所組成（螃蟹就是現代的例子）。三葉蟲的三個體節為頭盾（頭）、胸廓（身

體)和尾節(尾)。其名稱中的「三」並非指這三個從頭到尾的體節,而是指牠的三個側葉:左肋葉、中軸葉和右肋葉。在三葉蟲漫長的歷史進程中,牠們進化到在許多環境都出現了蹤跡,從一開始是海洋中的底食者,接著四處游動,最後在陸地上行走。由於牠們堅硬的外部骨骼,故而留下了大量的化石紀錄,這就是為什麼現今我們對三葉蟲如此了解,儘管牠們的時代如此遙遠。

科學家對三葉蟲的祖先為何還不甚清楚,但有些理論將答案指向史普里格蟲(Spriggina)。真正的三葉蟲在 5.4 ~ 5.2 億年前首次進化。牠們快速進化成許多種類,但有幾種在寒武紀末期(5.41 ~ 4.85 億年前)滅絕。奧陶紀(4.88 ~ 4.44 億年前)和志留紀(4.44 ~ 4.16 億年前)時期,三葉蟲的種類更少,不過能夠倖存下來的種類往往更大型、更擅長在海底以外探索。接著,在泥盆紀(4.16 ~ 3.59 億年前)之後,只有一種稱為「𩚑頭蟲」(Proetida)的三葉蟲,存活到石炭紀(3.59 ~ 2.99 億年前),最後在二疊紀末期(2.51 億年前)的化石紀錄中消失。

至今,已確認了超過 20,000 種的三葉蟲。經歷多次大滅絕,三葉蟲十足的多樣性及令人敬畏的耐力,讓牠們成為世上有史以來最成功的動物群體之一。

43.為什麼作者在第一段中將三葉蟲與人類進行比較?

- (A) 為了強調三葉蟲的耐久性。
- (B) 為了展現牠們在解剖學上的不同之處。
- (C) 為了指出恐龍存活於兩者存在的中間時期。
- (D) 為了論辯三葉蟲的身體更強壯。

44.圖中的線指的是三葉蟲的哪個部位?

- (A) 胸廓。 (B) 頭盾。
- (C) 尾節。 (D) 軸葉。

45.三葉蟲經歷下列過程的順序為何?

- a. 變得更會移動。 b. 死亡並滅絕。
- c. 進化成眾多種類。 d. 減少為單一物種。
- e. 出現在化石紀錄中。

- (A) a → b → d → c → e
- (B) c → e → a → d → b
- (C) e → c → a → d → b
- (D) e → a → c → d → b

說明:在文章第三段找出與 a ~ e 項對應的說法,根據文內所敘述的時序,可得排序 e → c → a → d → b。

- a. Become more mobile → ...exploring beyond the ocean floor...③
- b. Die off and go extinct → ...finally disappearing from the fossil record...⑤

- c. Evolve to numerous species → They diversified rapidly...②
- d. Reduce to one species → ...only a single species...survived...④
- e. Appear in the fossil record → True trilobites first evolved...①

46.作者沒有用以下哪一項來表現三葉蟲的特別之處?

- (A) 牠們的生存能力。
- (B) 牠們存在的時間長度。
- (C) 牠們的種類數量。
- (D) 牠們驚人的外貌。

重要字詞

- go extinct 絕種;滅絕
- thrive v. 繁盛;蓬勃發展
- in question 所討論的……
- segment n. 體節;部分
- axial adj. 中軸的
- external adj. 外部的
- point to... 指向……(為答案、原因等)
- species n. 種;物種
- endurance n. 耐力
- multiple adj. 多次的
- extinction n. 滅絕;絕種

47 ~ 49 題

根據最新數據,全球約有 15 億素食者,占了地球人口近 20%。雖然許多人是出自於宗教因素茹素,尤其是在印度,但在其他地區因個人因素而吃素的人數比起過去多了很多。然而,素食族群中也充滿多樣性。以下我們來看看三種最常見的素食主義類型。

乳蛋素食主義是一種不含肉類和海鮮的飲食習慣,但允許食用乳製品和蛋製品(在拉丁語中,「lacto」指的是前者,「ovo」指的是後者)。一般來說,這是在西方文化中最常見的素食主義,當一個西方人稱自己是素食者時,他或她很可能就是乳蛋素食者。換句話說,「乳蛋」二字很少說出來,通常是暗示或假設來的。大家選擇乳蛋素的原因很廣泛,從保護環境並減少對動物的傷害,到要變得更健康以及單純只是覺得肉的味道或口感不吸引人。

佛教素食主義是東亞獨有的現象。根據佛教，所有生物都是相互牽連的，一隻動物可能是某人前世的母親。佛教素食介於純素食主義和乳蛋素食主義之間。某些佛教素食者會食用或飲用乳製品，但大多數人不吃蛋。而佛教素食者的特別之處在於他們不吃五種「辛辣」蔬菜：洋蔥、大蒜、細蔥、蔥及韭菜。這些蔬菜被認為會「撩起」情慾，更不容易靜思。儘管許多僧侶、尼姑及老年人遵循佛教素，但要留意的是：在東亞大多數的學佛人士實際上並非如此。

純素主義無疑是過去十年中最流行的素食主義。這種更極端的飲食習慣避開所有來自動物的產品。舉例來說，如果酪蛋白（一種來自牛奶的蛋白質）被列為麵包的成分之一，純素主義者就會不吃。因為他們試圖全面避免使用動物產品，而非只有在飲食上（例如：他們可能不穿皮鞋），所以許多人稱純素主義不僅是一種飲食習慣，也是一種生活方式。隨著西方純素主義的快速盛行，大量的素食產品也跟著問世，比如：素美乃滋、素火雞肉、素手錶等。純素主義下還可再細分出許多類別。像是「生食」素食主義者只吃未烹煮的植物性食物。

47. 根據文章，下列何者正確？
- (A) 世界各地的素食者僅能分為三類。
 - (B) 在印度選擇素食的人數正在成長中。
 - (C) 大部分非印度籍的人們是由於宗教因素選擇吃素。
 - (D) 地球上五分之一的人遵循可能被描述為素食的飲食。
48. 在歐洲和北美，由於需求快速成長，因此有愈來愈多的素食產品出現在市場上。

評分原則

- (1) 答案完全正確（包括字形變化），得 2 分。
 - (2) 拼字錯誤或者字形錯誤，得 1 分。
 - (3) 未作答或答案錯誤，得 0 分。
49. 請根據選文內容，將下列五種食物填入表格中正確的位置。每種食物不限填一次，也有可能不需填出。
- 蔥、切達奶酪、胡蘿蔔、火雞、蛋塔

飲食	可接受的食物
乳蛋素食者	蔥、切達起司、胡蘿蔔、蛋塔
佛教素食者	切達起司、胡蘿蔔
純素食者	蔥、胡蘿蔔

評分原則

- (1) 每格全對，得 2 分。
- (2) 不論多（或少）填，每格填對一項即得 1 分。
- (3) 未作答或答案錯誤，得 0 分。

二、英文作文

(參考答案)

When it comes to studying, there are two types of people. Some prefer a public space such as a café, while others would rather bury their noses in books in a quiet library. There are potential upsides and downsides to each of these studying environments. Cafés are known for their laid-back atmosphere, which can make people feel at ease as they cram for their upcoming exams. On top of that, strong coffee gives them the energy they need to carry on for multiple hours. However, while some people study best with constant background noise, this can severely disturb others. Libraries, on the other hand, are dead silent. Unfortunately, though, they are so quiet and peaceful that some people may find themselves drifting off to sleep instead of staying focused on their readings.

There is no doubt in my mind that I belong to the type of person who prefers to study in the library. All my attempts to study in cafés have ended in failure. Due to their casual environment, I always end up doing casual things, like scrolling on my smartphone. I also can't help but get distracted watching people or overhearing the conversations of those around me. By contrast, the silence of a library is exactly what I need to zone in on my studies. When I am surrounded by others who are studying, it motivates me to do the same. I put my phone away to avoid looking like a slacker. Even if I run into a friend there, I know we won't get sucked into a long conversation because we don't want to bother our peers. For these reasons, I am far more efficient when studying in a library.

談到學習，有兩種類型的學習者。有人喜歡咖啡館等公共空間，而另一些人則寧願在安靜的圖書館裡埋頭讀書。這些讀書環境均各有潛在的優、缺點。咖啡館以其悠閒的氛圍而聞名，可讓人們在衝刺即將到來的考試時，感到輕鬆自在。最重要的是，濃烈的咖啡提供他們持續奮鬥數小時所需的能量。然而，雖然有些人在不間斷的背景噪音下學習效果最佳，但這對於其他人卻是嚴重干擾。另一方面，圖書館則是死寂無聲。但可惜的是，圖書館太過靜謐，以致於有些人可能會發現自己昏昏欲睡，而不是專心讀書。

我認為我毫無疑問是屬於喜歡在圖書館讀書的類型。我每次試著在咖啡館用功，結果都以失敗告終。由於咖啡館的環境休閒，我最後總是做些像是滑手機的閒事。我也情不自禁地分心看著人們或無意中聽到周圍人群的談話。相較之下，圖書館的寂靜正是讓我專心唸書所需要的。當我周遭的人都在念書，就會激勵我做同樣的事情。我把手機收到一旁以免看起來懶散不認真。即使我在圖書館遇見朋友，我知道我們不會聊得太久，因為我們不想打擾同儕。出自這些原因，我在圖書館讀書的效率高了許多。

重要字詞

二、綜合測驗

11 ~ 15 題

自 1960 年代以來，幾支北美運動球隊因使用被認為帶有種族主義的隊名和吉祥物而備受抨擊。批評他們的主要論點在於他們就是「文化挪用」的示範，意思是，在未經尋求承認或給予補償的情況下，某文化的一部分遭到另一文化的取用。

早期有一些球隊的隊名含有對黑人、亞洲人或阿拉伯人種族誹謗的例子，但顯然最常見的，還是與美洲原住民有關的隊名。簡單舉幾個例子，如華盛頓「紅人」隊（帶有種族意識的詞彙，暗示原住民有「紅色」皮膚）、狄肯生州立大學的「野人」隊（暗示原住民未開化而具有冒犯意味的字詞），和艾德蒙吞愛斯基摩人隊（稱呼北極因紐特人的過時用語）。

雖然上述球隊都已改了名稱，但許多其他主要的職業球隊仍繼續使用與美洲原住民有關的隊名，如：克利夫蘭印第安人隊、芝加哥黑鷹隊以及堪薩斯城酋長隊。有些球隊也堅持使用形似美洲原住民的吉祥物。這些隊名和吉祥物極具爭議，且被認為對美洲大陸的原住民帶有侮辱性質，他們在過去 500 年裡，已歷經了土地被偷奪、族人被謀殺，還有條約被違反的遭遇。

11. (A) 分享 (B) 取用 (C) 儲存 (D) 出借
說明：此題考上下文語意，從第一句可知北美球隊「使用 (their use)」的隊名和吉祥物，是對應此句「奪去使用」components of one culture，故選 (B) taking，符合文意。
12. (A) 平均 (B) 此時 (C) 簡而言之
(D) 顯然（與最高級連用）

13. (A) 自從；既然 (B) 一旦 (C) 雖然 (D) 除非
說明：此題考轉承詞。從句中的 have all changed 和 continue to use 可知前後子句文意對比，故選 (C)。
14. (A) 堅持 (B) 申請 (C) 投資 (D) 迎合
說明：此題考上下文語意，由前句的 continue to use，可知要選 stick with their use，使文意連貫。
15. (A) 具爭議性的 (B) 獨特的 (C) 一致的
(D) 占優勢的
說明：從首段的 racist team names and mascots 和 argument against them，惟 (A) controversial 可呼應，且與 insulting to the continent's original people 搭配合宜。

重要字詞

come under fire 備受抨擊

racist adj. 種族主義的

appropriation n. 挪用（未經同意）

acknowledgement n. 承認

compensation n. 補償

racial adj. 種族的

slur n. 誹謗

savage n. 野人；野蠻人

uncivilized adj. 未開化的

outdated adj. 過時的

treaty n. 條約

violate v. 違反

16 ~ 20 題

懸雍垂是懸掛在我們喉嚨後端的那塊肉，幾世紀以來一直是論辯的主題。懸雍垂的用途是什麼，為什麼其他動物沒有懸雍垂？

在過去，有些文化將懸雍垂視為具有潛在危險的器官，因為會導致嬰兒猝死，所以在出生時就切除它。即使到了今天，有時仍會割除懸雍垂來治療睡眠時的呼吸問題。但另一方面，懸雍垂在我們日常生活中好幾個不同區塊如從說話到進食，都有助益。

首先，懸雍垂在某些語音的發音中扮演重要角色，尤其是在法語和阿拉伯語等語言。其次，懸雍垂會產生大量唾液，協助在說話的同時滋潤喉嚨。正因如此，摘除懸雍垂的患者經常提到有喉嚨乾燥的症狀。第三，懸雍垂會防止食物在吞嚥時進入鼻腔。

這些功能顯示懸雍垂絕非毫無意義。它反而是一個高度進化的器官，發揮多重作用，協助人類成為現在的模樣。

16. (A) 平均地 (B) 生動地 (C) 潛在地 (D) 最初地

- 17.(A) 此外 (B) 另一方面 (C) 在某種程度上
(D) 結果
說明：觀察前後文意出現轉折，從 a potentially hazardous organ，變成 the uvula helps us in several different areas of our daily lives, from speaking to eating，故選 (B) On the other hand 來帶出「懸雍垂具有功能」。
- 18.(A) 瘋狂的 (B) 清楚的；無障礙的 (C) 罕見的
(D) 乾燥的
說明：此題考細節，從上句的懸雍垂有助滋潤喉嚨 (moisten the throat)，可推知失去懸雍垂會引起喉嚨乾燥，故選 (D)。
- 19.此題考被動語態進行式。when 子句的主詞 it 指的是「food」。
- 20.(A) 絕非…… (B) 不僅是…… (C) 實在太……
(D) 多於……
說明：此題考片語，從 these functions 可見懸雍垂具有功能，與 pointless 不符，故選 (A) anything but (絕非……) 來修飾 pointless。

重要字詞

uvula *n.* 懸雍垂
hazardous *adj.* 危險的
saliva *n.* 唾液
moisten *v.* 滋潤
complain of (患者) 提到有……的症狀
nasal cavity *n.* 鼻腔
pointless *adj.* 毫無意義的

三、文意選填

21 ~ 30 題

超級富豪似乎經常一直是愈來愈富有。1999 年，微軟創始人比爾·蓋茲成為第一個資產淨值達到 1,000 億美元的人。亞馬遜創始者傑夫·貝佐斯在 2020 年將這個數字翻了一倍，而特斯拉創始人伊隆·馬斯克僅在兩年後就達到了 2,500 億美元。從這些數字，有人可能會認為這些人就是史上最有錢的富豪，但其實這個假想並不完全正確。

事實上，將通貨膨脹納入考量，過去已出現過更為富有的人。創立 Standard Oil 公司且是最大股東的約翰·D·洛克斐勒，他是第一個個人財富達到 10 億美元的人。不過，如果將他臨終時的身價換算成今日的等值金額，將等同於 3,600 億美元，洛克斐勒就會是美國歷史上最富有的人。

回到古代，衡量財富變得有點困難，因為被征服的土地常也被認為是統治者個人財富的一部分。有些歷史學者謹記著這點，便認為非洲馬利帝國的

穆薩一世是有史以來最富裕的人。馬利帝國的第十位統治者穆薩一世 (1280 ~ 1337 年)，靠著開採國家資源——黃金和鹽——創造了可觀的財富。穆薩一世以發送黃金為禮而聞名，但就因黃金如此貴重反而大幅影響了全北非的金屬價格。粗略估計，他的財富大約相當於現代的 4,000 億美元。

追溯到更早，古羅馬的奧古斯都皇帝被認為擁有全球經濟產量的 25 ~ 30%，這包括他個人擁有整個埃及。《時代雜誌》曾估算，他的財富等同於今天貨幣的 4.6 兆美元 (即 46,000 億美元!)。然而，也有歷史學家指出這些數字不太可信。畢竟，估算遙遠過去的財富幾乎是不可能的。

- 21.本題要填動詞。由上下文語意從 \$100 billion 到 \$250 billion 可判斷，選 (F) doubled 符合數字漸增的文意。
- 22.本題要填名詞。由本段 John D. Rockefeller 的例子中提到 \$1 billion 增值為 \$360 billion 可知 (D) inflation 符合本段的討論要旨。
- 24.本題考細節。雖然 (E) vast 和 (I) conquered 在文意上都可修飾 lands，但觀察文意，conquer「征服」可與 ruler「統治者」互作呼應；vast「廣闊的」與 ruler 無因果關係的聯想，非理想答案。

重要字詞

shareholder *n.* 股東
convert A into B 將 A 換算成 B；將 A 轉換成 B
equivalent *n.* 等值物
conquer *v.* 征服
exploit *v.* 開採 (天然資源等)
approximately *adv.* 大約
output *n.* 產量
currency *n.* 貨幣
evaluate *v.* 估算；評估

四、篇章結構

31 ~ 34 題

極光 (aurora，也稱為 aurora polaris 或 polar lights)，是在天空中自然發生、色彩鮮豔的繽紛光束。顧名思義，極光僅限於地球的極區。北極地區的極光稱作北極光 (aurora borealis 或 Northern Lights)，南極地區則稱為南極光 (aurora australis 或 Southern Lights)。

能目睹這個現象簡直就是極端奇幻。極光往往以波浪的形式呈現，在空中舞動著，揮灑出猶如流動的簾幕、螺旋、光線、閃爍光點或是雲朵的圖案。綠色是最常見的顏色，出現在海拔較低的地區。藍色通常更低，而紅色則經常代表極光發生於較高的

大氣層中。雖然極光主要為視覺現象，但許多觀測者表示極光也會發出聲音。那是一種微弱的爆裂聲，通常極光出現在頭頂正上方時會聽到。儘管全年都有極光，但只有在冬季，夜晚的時間夠長讓天空變得夠黑，才能用肉眼看到極光。

雖然科學家們對極光的了解還不完整，但對於成因是相對清楚的。簡單來說，這些光是由太陽風或是太陽大氣層釋出的帶電粒子流，與地球磁場交互作用而產生。這些帶電電子和中子與地球高層大氣的氣體碰撞，產生微小的光爆發。當數十億個這樣的撞擊接連發生，就會產生極光。地球的磁場一般會將粒子引向北極和南極，這就是為什麼極光出現在那些區域的原因。

由於極光純粹的美麗，難怪許多早期文明認為極光具有神奇特質。古代中國人稱極光為「天狗」，有些美洲原住民則認為極光代表亡者的靈魂。

重要字詞

- aurora *n.* 極光
 nothing short of 簡直就是
 mystical *adj.* 奇幻的
 altitude *n.* 海拔；高度
 indicative *adj.* 代表；顯示
 crackling *n.* 爆裂聲
 charge *v.* 帶電；充電
 electron *n.* 電子
 neutron *n.* 中子
 collide *v.* 碰撞
 magnetic field *n.* 磁場
 steer *v.* 引導
 attribute sth. to sth./sb. 認為某事物／某人具有……的特質
 the departed *n.* 亡者

五、閱讀測驗

35 ~ 38 題

很少有人質疑「笑是最佳良藥。」這句古老諺語，而客觀的科學分析確實佐證這句話。這協助我們初步檢視當我們輕笑時身體到底發生了什麼事。歡笑僅限於人類和其他靈長類動物，是始於大腦額葉的不自主反應。額葉分為兩部分：左側是處理語言的實用區；右側是創造區。前者會辨識潛在的幽默情況，而後者的工作是接著決定那個人是否真的覺得值得一笑。但其實額葉並不能讓我們發笑；這是屬於邊緣系統的任務，即大腦中處理我們的行為和情緒反應的部分。一旦邊緣系統獲准啟動，就會發動笑的全身物理過程。

短期來看，這個物理過程包括釋放讓我們感覺愉悅的腦內啡、增加氧氣的攝入量，並且刺激心、肺以及肌肉。笑的過程首先啟動隨即克服身體的壓力反應，因為笑能降低了皮質醇，即「壓力荷爾蒙」，帶來極大的放鬆感並降低肌肉緊張。從長遠來看，經常笑可以提高身體的免疫系統、緩解慢性疼痛、紓解抑鬱以及提高自尊和整體生活的滿足感。

從 1960 年代開始，有些心靈導師接受了人類可以出於冥想或診療目的而自主大笑的想法。例如：印度大師 Rajneesh 向他的追隨者傳授了「動態冥想」，以鼻子急速呼吸 10 分鐘，然後「順其自然」，無論是喊叫、跳躍、顫抖，或是狂笑。在 1990 年代，印度醫師 Madan Kataria 參考了這些先驅者的想法，創立了「國際愛笑瑜伽」。該組織現在在全球擁有超過 5,000 支分會，組織成員會強迫大笑來練習瑜伽。根據一名成員的說法：「大腦不知道我們在假裝大笑。」，其帶給人體的益處，跟正常大笑並無差異。

35. 以下事件發生的順序為何？

- 決定需要以笑回應。
 - 注意到可能有趣情況的存在。
 - 出現了有趣的話或有趣的情況。
 - 身體產生動作並釋放腦內啡。
- (A) d → c → b → a
 (B) c → b → d → a
 (C) c → b → a → d
 (D) a → b → d → c

36. 文中沒有提及笑的正面作用為何？

- 燃燒熱量。
- 改善情緒。
- 提供器官能量。
- 緩解肌肉緊張。

37. 第三段中的「pioneers」指涉的是什麼？

- 定居者。
- 大師的追隨者。
- 超過 5,000 支分會。
- 一些心靈導師。

38. 關於自主大笑，文章提到了什麼？

- 它不具有不自主大笑的效果。
- 不存在這種笑，因為笑只會是不由自主的。
- 它可以產生與不自主大笑相同的功效。
- 它總是伴隨著喊叫、跳躍和顫抖。

重要字詞

- primate *n.* 靈長類動物
 involuntary *adj.* 不自主的；不自覺的
 intake *n.* 攝入量
 stimulate *v.* 刺激

overwhelming *adj.* 極大的
 tension *n.* 緊張
 chronic *adj.* 慢性病的；長期的
 alleviate *v.* 紓解
 self-esteem *n.* 自尊
 overall *adj.* 整體的
 guru *n.* 大師；權威

39 ~ 42 題

魔術方塊（Rubik's Cube）是全球最為人知曉的立體拼圖。它的名字取自於一名匈牙利建築師 Ernő Rubik，他於 1974 年發明魔術方塊，在 1980 年賣給玩具製造商 Ideal Toy Corp。魔術方塊的問世在 1980 年代初期引起一股熱潮，但在 1983 年左右銷量暴跌，直到 2000 年代初期才又再度流行。迄今為止，已售出超過 3.5 億個魔術方塊，成為世界最暢銷的玩具之一，與芭比娃娃和風火輪汽車並駕齊驅。

這個經典玩具比乍看之下複雜得多。它是由 26 個獨立立方體組成的拼圖，每個立方體被稱作「小方塊」，長寬皆為 1.9 公分，魔術方塊每個平面的總長度和寬度均為 5.7 公分。每一面有九個立方體，不論何時立方體中有六種可能的平面（三個水平面和三個垂直面）。每個小方塊都藏有一個內部機制不但可與其他小方塊互相連結，且在玩家旋轉整個平面時又可以移動。六個平面連接著內部核心，繞著核心可以在三個不同的軸上旋轉。每個小方塊的表面是六種顏色之一（紅、黃、綠、藍、橙或白）。遊戲目標是旋轉各個面，直到立方體的每一面各是同一種顏色。

驚人的是，這個玩具有 43 萬兆（即 43 後有 18 個零！）種可能的顏色組合。因此，當然也會有許多可以破解魔術方塊的方法。被認為最簡單的一種方法是，先在一個平面上組出一個白色十字形，接著四個角也補上白色，拼出一個全白的面。之後，過程變得更複雜了，涉及的演算法不在本文的討論範圍。由於解決魔術方塊所需的所有計算和前瞻性思維，讓它被廣泛認為是一種訓練大腦的工具，能快速破解則被認為是高智商的象徵。

39. 文章中沒有包含下列何者？

- (A) 魔術方塊的歷史。
- (B) 魔術方塊的名稱由來。
- (C) 基本的魔術方塊組成和設計。
- (D) 破解的完整步驟。

40. 作者為什麼提到顏色組合的總數？

- (A) 此資訊是破解魔術方塊的關鍵。
- (B) 解釋為什麼賣出這麼多的魔術方塊。

(C) 幫助讀者進一步了解玩具的樣子。

(D) 讓讀者更容易理解沒有單一的破解方法。

41. 用最基本的方式，破解魔術方塊的第一步是什麼？

42. 關於魔術方塊，本文的看法是什麼？

(A) 它不需要太高的智商就能破解。

(B) 一開始看起來可能很簡單，但實際上並非如此。

(C) 玩具公司製造起來意外地容易。

(D) 它比芭比娃娃和風火輪合起來還要受歡迎。

在比較不同地區的佛教版本時，藏傳佛教特別獨樹一格。有部分原因是西藏的佛教徒修行一種稱為「金剛乘教法」（Vajrayana，為鑽石車乘之意）的佛教形式，這與小乘佛教（Theravada，主要在東南亞的修行形式）和大乘佛教（Mahayana，主要在中國和東亞的修行形式）有很大不同。另一個原因是藏族深受西藏本土民間宗教「苯教」（Bon）的影響。

起初，苯教是一個萬物有靈論的宗教，這意味著苯教信徒（稱作 Bonpo）相信所有事物無論有無生命，都擁有靈魂。當時他們認為苯教只是一套傳統，而不是一個宗教。苯教牧師本人被稱為「苯（Bon）」，他的職責是主持儀式，如獻祭牲畜，來幫助人類臨死時踏上通往來世的旅程。他還指導人們不要冒犯世上許多的靈，並避開有危險力量的地方——請記住，藏人居住在險峻的高海拔環境中。

當佛教於西元第 8 世紀首次進入西藏時，被視為外來宗教。一個盛行的傳說是，將佛教引進西藏的印度大師蓮花生大士（Padmasambhava）擊敗了

苯教惡靈，並讓他們成為佛教的保護者。實際的過程則是幾個世紀以來，苯教的許多元素與佛教融合，成為了藏傳佛教。其中包括深喉音誦唱、在聖地懸掛色彩繽紛的祈禱旗幟，以及強調死亡與來世之間階段的儀式等特徵。

更複雜的是，大約從第 10 世紀開始，苯教徒確實真的開始將苯教視為一個宗教。此外，正如藏傳佛教從早期的苯教借取修行形式和教義，「新苯教」也吸收了許多佛教內容。苯教至今仍然存在，但經過數個世紀已有很大變化，以致於很難界定苯教的哪些方面是來自佛教，反之亦然。

43.第一段沒有提到的是什麼？

- (A) 苯教於何時出現。
(B) 藏傳佛教為何與眾不同。
(C) 西藏信奉何種形式的佛教。
(D) 在哪裡發現不同形式的佛教。

44. 下列何者與第二段中的「adherents」的含義最接近？

- (A) 追隨者。
(B) 作曲家。
(C) 移民。
(D) 專業人士。

45.關於蓮花生大士我們可以推斷出什麼？

- (A) 他是喉音詠唱的專家。
(B) 他代表印度征服西藏。
(C) 他受到藏傳佛教徒的高度認可。
(D) 他後來改信苯教。

46. 作者可能會以下列何者來描述苯教與佛教的關係？

- (A) 暴力的。
(B) 浪漫的。
(C) 不存在的。
(D) 複雜的。

人類世

「人類世（Anthropocene）」是一個提案中的地質世名稱，始於人類開始對地球產生重大影響的時候。世，是根據全球地質的重大變化而切分的時期。人類世的基本論點是：人類已深刻改變地球，所以目前這段時期應視為一個新的世。人類世這個詞源自於「anthropo」，在古希臘文中表「人」的意思。但人類世並非是普遍接受的說法。有些專家認為我們仍處於全新世，即從上個冰河期結束後開始的紀元。

《國家地質雜誌》訪談系列

第5週主題：我們正在人類世嗎？

專家 1：Ben Cowan (BC)

問：讀過您著作的人都知道您是人類世的主要支持者。您對人類世最大的論據是什麼呢？

BC：毫無疑問，人類已經重塑了地球，改變的程度在未來數百萬年的地質紀錄中都還能清楚見到。我們破壞棲息地、將外來物種引進不同的大陸、讓海洋酸化、造成氣候變遷，還滅絕了數千種物種。

問：人類世是從什麼時間點確切開始的？

BC：世不會這麼突然地開始和結束。舉例來說，在小行星滅絕恐龍、結束白堊紀之前的1千萬年，恐龍族群早已衰弱。然而，我認為我們正處於不尋常的時期。人類已加速地質歷史，而我認為工業革命是最大的轉捩點。

專家 2：Emelia Mackenzie（EM）

問：在您最近爆紅的網路文章中，您反對人類世的概念。為什麼呢？

EM：我認為人類正生活在一個「新」世紀這個主張的主要問題是時間框架。世不是在一夕間來了就走。在地質時間中，人類時期不過是滄海一粟。我們應該稱為「事件」，而不是「世」。

問：即使時間短暫，但人類對世界的改變還不足以讓這段時期被認為是一個新的世嗎？

EM：我不這麼認為。想想看：喜馬拉雅山脈在 5 千萬年的時間裡生長，而在 2 億年前，地球上的各大洲是連在一起，形成一個超級陸地。這才是我們在討論地質歷史時所談的規模。從我們的角度來看，人類對環境的影響或許看似巨大，但從地球的角度來看，我不認為會留下足夠的痕跡來證明新紀元的說法是正確的。

47. 下列關於人類世的敘述何者正確？

- (A) 人類世大約始於 1 千萬年前。
- (B) 所有地質專家差不多都能接受人類世。
- (C) 人類世是以古希臘人或人類的名字命名。
- (D) 它把通常自然發生的事情咎責於人類。

48. 根據兩位專家中的其中一位的說法，當前這個因人類而造成地球巨大變化的時期，應該只能被視為一個事件，因為從地質時間來看，人類歷史不到一秒鐘。因此，提出地球歷史已進入一個新地質世的概念是不合理的。

評分原則

- (1) 每格全對，得 2 分。
- (2) 只對其中一格，得 1 分。
- (3) 未作答或答案錯誤，得 0 分。

49. 在 Ben Cowan 的訪談中，哪個片語的意思表「突然發生重大變化的時候」？

評分原則

- (1) 完全正確，得 2 分。
- (2) 每個拼字錯誤扣 1 分；增「biggest」扣 1 分。
- (3) 未作答、少字，或答案錯誤，得 0 分。

二、英文作文

(參考答案)

After the COVID-19 pandemic spread to Taiwan at the beginning of 2020, the government created a regulation of universal mask-wearing in public places. However, despite this new rule and the proven safety that masks offer, some individuals still refused to wear masks. What's worse, a few of these individuals went into crowded indoor places with mask rules clearly posted on the doors. Upon being asked by a convenience store clerk to put on a mask or leave, one guy even punched both the clerk and a random customer in the store, just like the previous news. Besides hurting and scaring others, another consequence of this man's actions is that other clerks across the country probably felt nervous about asking customers to put on their masks after that happened.

If I had been a customer in that store, I would have experienced several strong emotions at once. When first seeing the man enter the store with no mask, I would have felt anger at his selfishness and lack of decency. Next, the thought would have crossed my mind that he could be COVID-positive and, by not wearing a mask, spreading his virus to me and others in the store. This would have made me feel nervous and want to get out as soon as possible. However, once the man became violent and attacked the clerk, I would be in a dilemma. Should I escape or should I help the clerk? If I chose the former option, I would be OK, but the clerk might be badly injured. But if I stayed to help, I might get punched as well, like one customer did, or worse, I might catch COVID-19 from the man and spread it to my beloved family members and friends later. In summary, I truly feel that this man's actions were shameful and he should be punished accordingly.

在 2020 年初 COVID-19 疫情在臺灣蔓延開來後，政府訂立了在公共場所一律佩戴口罩的規定。然而，儘管有這條新規定並已證實口罩可提供的安全性，仍有一些人拒絕戴口罩。更糟糕的是，這其中的幾個人進入擁擠的室內場所，門上清楚張貼著口罩規定，而當便利商店的店員要求戴上口罩或是離開時，有人甚至在店內打了店員和隨機一名顧客，就如同之前的新聞一樣。除了傷害和恐嚇他人，這個人行為導致的另一個後果是，全臺其他商店店員可能在此之後對於要求顧客戴口罩會感到緊張。

如果我是那家商店的顧客，我會同時經歷好幾種強烈情緒。起初看到這名男子不戴口罩進入店內時，我會對他的自私和沒有禮貌感到憤怒。接下來，我的腦海中會閃過他可能是 COVID-19 確診者的想法，他不戴口罩會將他的病毒傳播給我和店裡的其他人。這會讓我感到緊張且想盡快離開。然而，一旦那個人變得暴力並襲擊了店員，我就會陷入兩難。我應該逃跑還是應該幫助店員？如果選擇前者，我會安然無恙，但店員可能會受重傷。不過若我留下來幫忙，我可能也會跟受到攻擊的顧客一樣，或者更糟的是，我可能會從該男子身上感染 COVID-19，然後傳染給我心愛的家人朋友們。總而言之，我真的覺得這個人的行為是可恥的，應該受到應有的懲罰。
